

Respondent Appearance

Institutional appearance

Counsel appears for the institutional Attorney General respondent on February 18, 2025. Counsel accepts electronic service in SYN-CA4-25-AG-4301 and identifies the designated case mailbox and telephone field maintained for this matter. The appearance covers the respondent's participation in docket administration, record proceedings, merits briefing, oral argument if ordered, rehearing matters, and issuance of mandate.

Counsel appears under respondent appearance code DHS-APP-4; the court account associated with that code contains the individual attorney's admission and contact details. The public filing confirms who may receive and make filings for the institutional respondent without repeating account information. Counsel has reviewed the petition package and the attached January 13 Board order, but this appearance states no position on the petition's merits, the accuracy of the coming agency certification, or any factual allegation attributed to A.R.M.

Respondent Appearance

Scope and reservations

By appearing, the respondent neither concedes CAT eligibility nor waives a position that must be raised in a later filing. The respondent reserves its response to any motion concerning omission, correction, supplementation, briefing, or mandate. It also reserves its characterization of the agency's separate treatment of Unit Four, Harbor League, registry evidence, formal safeguards, and complaint routing. No record-composition agreement is made on this page.

The respondent has not filed a motion directed to the petition's February 11 receipt date, and this appearance should not be read as such a motion. Any request for dismissal or enforcement of a filing rule must identify its own authority and requested disposition. Likewise, acceptance of service does not authenticate a post-order document, admit a disputed fact, or transform a court filing into part of the agency record.
