

SYNTHETIC TRAINING RECORD — NOT FILED — ALL FACTS AND IDENTIFIERS
ARE FICTIONAL

DEPARTMENT OF HOMELAND SECURITY EXECUTIVE OFFICE FOR IMMIGRATION
REVIEW

Notice to Appear: A.R.M.

Charge copy and procedural cover

Proceeding number: SYN-E0IR-24-RM-0113. Respondent is identified only as A.R.M. The initials-only privacy protocol omits an expanded name, street address, date of birth, passport number, and registration number. Nationality is stated as the Republic of Kalyra.

The charging file alleges that A.R.M. was admitted to the United States as a temporary visitor on August 8, 2023, was authorized to remain through December 31, 2023, and remained after that date without a later grant of status. DHS charges removability under 8 U.S.C. § 1227(a)(1)(B). This page records an allegation, not an adjudicated fact.

The notice issued January 9, 2024. Hearing time and place were supplied in the notice rather than deferred. The immigration court received a service return on January 12, 2024.

Factual allegations stated in the charging document

1. A.R.M. is not alleged to be a citizen or national of the United States.
2. A.R.M. is alleged to be a citizen of Kalyra.
3. DHS alleges inspection and admission as a temporary visitor on August 8, 2023.
4. DHS alleges an authorized stay ending December 31, 2023.
5. DHS alleges continued presence on January 9, 2024, without an extension or change of status.

The charging document does not allege fraud, criminal conduct, persecution of another person, or a security ground. It does not decide eligibility for protection under the Convention Against Torture. Master-calendar pleadings will address which allegations are conceded and whether a CAT protection claim is preserved.

Source note: the admission date, class, and end date come from admission-history entry DHS-SYN-44.

Charge and theory of removability

DHS states one charge: after admission as a nonimmigrant, A.R.M. remained for a time longer than permitted. The charge rests on the alleged December 31, 2023 expiration and January 9, 2024 continued presence.

The notice separates that threshold charge from protection. Even if removability is later conceded, A.R.M. may present the CAT application described in the scheduled proceedings. The notice therefore does not state that removal to Kalyra will occur regardless of protection and does not resolve whether withholding or deferral is required.

The initial evidence list identifies only the admission-history printout, the notice issuance record, and service materials. Procurement records, declarations, medical materials, and country evidence are not charging evidence and are not attached to this notice.

The notice uses a narrative format and carries no form barcode, street address, or personal identifier beyond A.R.M.'s initials. Its operative content is the numbered allegations, charge, hearing notice, and service history.

Hearing notice and service event

The notice directs A.R.M. to a master-calendar hearing on February 6, 2024, at 9:00 a.m. Eastern Time before the immigration court. Remote-appearance instructions will issue through the counsel service channel if counsel enters an appearance.

On January 9, an officer offered personal delivery at the temporary processing site. A.R.M. declined to sign an English-only acknowledgment until an interpreter was available. The officer retained the packet and logged the reason rather than recording refusal of service.

On January 12, a Kalyrian-language interpreter read the hearing date, attendance consequences, right-to-counsel advisal, and address-change instruction. A.R.M. accepted the paper copy and signed only with the initials A.R.M. The interpreter and serving officer used employee codes INT-14 and SV-22.

The service return therefore identifies January 12—not January 9—as completed personal service. Attendance and any failure-to-appear question must be determined from the February 6 hearing record, not forecast in this notice.

Language access and procedural advisals

The intake assessment records Kalyrian as A.R.M.'s strongest language and English as limited for legal vocabulary. It requests a Kalyrian interpreter for every substantive hearing. The request does not assert inability to read dates, numerals, or ordinary English messages.

Interpreter INT-14 states that the January 12 advisal covered: the nature of the proceeding; the right to retain counsel at no expense to the government; the obligation to attend; the need to provide a reliable service channel; and the possibility that relief or protection could be requested before the immigration judge.

A.R.M. asked whether requesting protection would concede the charge. The serving officer did not give legal advice and stated that pleadings and applications would be addressed by the court. The question is logged so the court can address the scope of any later pleading.

No statement on this page is offered as a waiver of a claim, appeal, or protection. Any master-calendar order will be the controlling source for A.R.M.'s pleadings and schedule.

Service-chain audit

The paper packet carries envelope control NTA-0113-A. The service-chain log records:

- January 9, 10:14 — notice printed and matched to the admission entry;
- January 9, 14:05 — delivery paused pending language access;
- January 10, 09:30 — interpreter request assigned to INT-14;
- January 12, 11:20 — interpreted advisal completed and paper copy delivered;
- January 12, 11:26 — A.R.M. initials receipt; officer SV-22 witnesses;
- January 12, 16:42 — scanned return uploaded to the agency docket; and
- January 16, 08:11 — immigration-court intake confirms legibility and hearing data.

The agency log identifies the scan by control suffix ...7C14. The intake entry reports eight pages, matching the notice, advisals, service return, and audit sheets in this packet.

The service history matters only to notice and chronology. It does not corroborate A.R.M.'s account of events in Kalyra.

Initial document and issue classification

The court intake clerk classifies the packet as NTA/pleading, entry 1 of the agency file. The packet establishes the institution initiating proceedings, the sole charge, the scheduled first hearing, and completed service.

Issues expressly not resolved by this packet include:

- whether A.R.M. experienced past torture;
- whether future torture is more likely than not;
- whether feared private actors act with public-official acquiescence;
- whether risk sources must be assessed cumulatively;
- whether any declaration offered in the proceeding will be admitted; and
- which materials the immigration court will retain in its case file.

The notice uses Kalyra only as the charged nationality and potential removal country. Merits evidence—not this institutional allegation—must supply any country and personal facts.

This packet contains eight pages. Later retention in the agency case file would not alter the limited charging and service propositions stated here.

Certification and packet map

Records custodian C-11 certifies that pages 1–8 form the complete charging and service packet received by the immigration court. The custodian compares the notice date, hearing data, allegation numbering, and January 12 service return against the docket intake entry.

Packet map:

1. procedural cover and charge summary;
2. numbered factual allegations;
3. removability theory and separation from protection;
4. hearing notice and completed service event;
5. language-access assessment and advisals;
6. service-chain audit;
7. initial classification and unresolved issues; and
8. this certification and map.

The initials-only protocol applies to the custodian code and respondent identifier. Each page addresses a distinct charging, service, or classification fact relevant to the scheduled proceeding.
