

Deficient Petition for Review

Initial tender and caption

A.R.M., through counsel, petitions for review of the Board of Immigration Appeals' January 13, 2025 order in agency docket SYN-BIA-25-0113. The petition names A.R.M. as petitioner, the institutional Attorney General respondent, and the Board as the agency whose final order is challenged. It requests review in the United States Court of Appeals for the Fourth Circuit and identifies the court docket caption without expanding A.R.M.'s initials or supplying unnecessary personal data.

The clerk received this tender on February 11, 2025, twenty-nine days after the Board order. Counsel asks that the court grant the petition, vacate the denial of Convention Against Torture protection, and remand for lawful consideration of the certified agency record. This page states the parties, order, agency, and relief; it does not represent that every attachment required for a conforming petition accompanies the initial tender.

Deficient Petition for Review

Known missing attachment

The petition describes the challenged order by agency, docket, and January 13 date, but the filing package does not contain a copy of that order. Counsel acknowledges the omission on review of the electronic receipt and asks the clerk to permit prompt correction rather than treat the absent attachment as abandonment. Electronic service of the two-page tender is made on the institutional respondent on February 11.

No other defect is conceded. The caption, parties seeking review, agency identification, order reference, requested relief, respondent service information, and counsel certification are present. The omitted order copy is a filing-completeness problem, not a statement about the contents of the administrative record or the merits of A.R.M.'s CAT claim. Counsel will respond to any clerk notice with the complete order already identified here.
