

Public Confidentiality Certificate and Access List

United States Court of Appeals for the Fourth Circuit

In re Cinder Lake Health Network, Inc., Petitioner

Related district action: *Rhea Calder v. Cinder Lake Health Network, Inc.*

Docket: SYN-CA4-26-WR-4401

Document code: A03

Filed: 2026-04-01

Certification of confidentiality

Counsel identifies the Sealed Petition for Writ of Mandamus (A05) and Sealed Essential-Record Appendix (A07) as the appellate documents containing sealed information; their redacted petition and appendix are equal-page public counterparts.

The certificate identifies the district court’s March 25, 2026 order, which granted sealing of the complete exhibits pending further order. It inventories both appellate pairs and confirms their equal page counts: eighteen petition pages and fourteen appendix pages. Linking the identified sealed papers, public counterparts, motion, and district order supplies the facts needed for an access ruling without quoting protected content here.

Authorized access list

The January 9 protective and Rule 502(d) order limits discovery material to confidential handling and use by entitled persons for this litigation; filing here creates no public or electronic district-court access.

The court and authorized staff may review the sealed material for adjudication; counsel of record and persons already entitled under the January 9 order may use it only within this litigation and subject to its confidentiality terms. The list excludes the public at large, unrelated employees, and anyone lacking authority under that protective order or a separate order of this Court.

Service method and integrity

The January 9 order provides nonwaiver protection for litigation disclosures but supplies no independent authority to file anything under seal. The two identified sealed documents are tendered to this Court under the applicable sealed entry and served conventionally in paper, outside CM/ECF, on counsel entitled under the protective order.

The district materials originated from verified offline paper copies and were served outside CM/ECF because Standing Order 25-SO-1 disables electronic viewing and CM/ECF service for sealed or restricted documents. The January 9 nonwaiver terms govern use but do not replace either court's sealing procedure. Recording that chain avoids any false implication of electronic district-court provenance or automatic appellate access.

Continuing duties

Counsel must preserve protected content, avoid raw sealed-page references in public work, and seek specific authority before any later disclosure or use beyond this proceeding.

If protected content later becomes unnecessary, a public replacement or narrower redaction must be considered. If access authority is revoked, the sealed copy must no longer be available and the public counterpart remains the citable record. Counsel remains responsible for preventing public briefs, oral argument, or record references from exposing a sealed page number in a manner that reveals protected content.
