Public Redacted Privilege Log — Exchanged Copy

United States District Court for the Eastern District of North Carolina

Rhea Calder v. Cinder Lake Health Network, Inc.

Civil Action No. SYN-EDNC-25-CV-0882

Public Exhibit DE29-2 — Exchanged February 5, 2026 outside CM/ECF; filed February 26, 2026

Cinder Lake provides this eight-page public redacted privilege log for materials responsive to Calder's investigation-file requests. It was exchanged as an entitled-party offline copy on February 5, 2026; the exchange was not a court filing. This public counterpart was filed on February 26 with Cinder Lake's opposition and sealing motion.

Dates, functional participants, document types, general subjects, and asserted protections are stated without revealing the withheld substance. The complete synthetic counterpart was provisionally lodged separately as an offline sealed exhibit.

Category Overview and Claim Method

The log groups twenty fictional items into counsel-directed interviews, requests for legal advice, memorandum drafts, litigation-preparation materials, and remediation advice. Each claim rests on the communication's purpose and content, not merely on the presence of a lawyer or a shared investigation topic.

Attorney-client claims cover confidential communications seeking or conveying legal advice. Work-product claims identify material prepared because regulatory or employment litigation was anticipated. Underlying ordinary records are not withheld solely because counsel reviewed them.

INT-001 Through INT-004 — Counsel-Directed Interviews

Items INT-001 through INT-004 are July and August 2025 interview memoranda reflecting confidential communications between outside counsel and employees in compliance, billing control, human resources, and supervision. The general subject is factual information requested so counsel could advise Cinder Lake.

The entries assert attorney-client privilege and opinion work product for counsel's questions, selections, notes, and impressions. Witnesses remain available for discovery about firsthand facts, subject to ordinary limits. Names and narrative descriptions appear only in the complete synthetic counterpart.

COM-005 Through COM-008 — Requests and Advice

Items COM-005 through COM-008 are July 2025 communications between Cinder Lake compliance or executive personnel and outside counsel. They concern the scope of the investigation, preservation, potential reporting obligations, and legal assessment of the billing exceptions.

The public log identifies no recommendation or legal conclusion. The entries assert attorney-client privilege; portions reflecting anticipated litigation strategy also assert work product. Administrative facts such as engagement date and preservation timing are separately disclosed.

MEM-009 Through MEM-012 — Draft Analysis

Items MEM-009 through MEM-012 are successive drafts, issue outlines, and annotations leading to the completed outside-counsel memorandum. They were prepared by counsel to organize evidence, test legal theories, and advise Cinder Lake.

The asserted protections are attorney-client privilege for advice communicated within the confidential relationship and opinion work product for counsel's selections and mental impressions. The final memorandum has a public categorical counterpart; draft evolution is not disclosed through that surrogate.

LIT-013 Through LIT-016 — Anticipated Litigation

Items LIT-013 through LIT-016 are August through October 2025 materials prepared because counsel anticipated a federal inquiry and an employment-retaliation dispute. They include a preservation assessment, interview follow-up plan, potential-claim outline, and litigation-response chronology.

The entries assert work product and, where advice was communicated to the client, attorney-client privilege. Public business events and dates appear in the nonprivileged chronology; counsel's strategy and evaluations do not.

REM-017 Through REM-020 — Remediation Advice

Items REM-017 through REM-020 are communications concerning legal evaluation of revised escalation guidance, targeted training, supervisory reconciliation, and monitoring. Cinder Lake publicly disclosed that those actions occurred, but not counsel's advice about their design or legal significance.

The entries assert attorney-client privilege and, for litigation-oriented evaluations, work product. Implementation policies and training records are ordinary-source documents and will be evaluated separately rather than categorically withheld.

Certification and Challenge Process

Mara Voss certifies after reasonable inquiry that the public descriptions permit item-specific evaluation without disclosing protected substance. Calder may challenge a stated basis through the Rule 26(b)(5) process, and Cinder Lake will provide clarification where possible without revealing the communication itself.

The public counterpart was exchanged February 5 and filed February 26, 2026. It does not reproduce the complete log, authorize access to its sealed counterpart, or represent retrieval of restricted material from an electronic court system.
