

**SYNTHETIC TRAINING RECORD — FICTIONAL PARTIES, PEOPLE,
OFFICES, IDENTIFIERS, AND EVENTS — NOT A REAL FILING**

Public Confidentiality, Access, Offline- Copy Provenance, and Outside-CM/ECF Service Certificate

United States District Court for the Eastern District of North Carolina

Rhea Calder v. Cinder Lake Health Network, Inc.

Civil Action No. SYN-EDNC-25-CV-0882

Docket Entry 30 — Filed February 26, 2026

Cinder Lake submits this public notice and certificate concerning proposed sealed Exhibits DE29-S1 and DE29-S2 and public counterparts DE29-1 and DE29-2. The complete exhibits contain synthetic privileged communications and detailed descriptions whose public disclosure would defeat the pending protection dispute.

The filing gives notice of the sealing request, identifies the governing local procedure, records entitled-party service, and establishes offline-copy provenance. It does not reproduce protected content.

Public Notice and Scope

Cinder Lake seeks restricted treatment only for the complete twelve-page investigation memorandum and complete eight-page privilege log. The public motion, this certificate, the August 21 letter, and equal-page public counterparts remain accessible.

Interested persons may evaluate the nature of the dispute from those public materials. The request is based on attorney-client privilege, work product, and the need to avoid irreversible disclosure before adjudication, not on a generalized confidentiality designation.

Offline Provenance and Clerk Lodgment

Rowan Vale generated the complete fictional memorandum in Cinder Lake's counsel file. Mara Voss maintained the litigation copy. On February 26, Voss delivered verified paper copies to the fictional district clerk for provisional sealed lodgment under Local Civil Rule 79.2 and Standing Order 25-SO-1.

The copies were not uploaded to CM/ECF, downloaded from a court service, or obtained by public docket access. The public docket records only the lodgment event and public counterparts.

Entitled-Party Exchange and Service

Voss gave Nina Ashe, counsel for Calder, an offline complete memorandum on January 29, 2026 under the protective order. She gave Ashe the complete privilege log offline on February 5. Those entitled-party exchanges enabled challenge to protection but were not court filings.

On February 26, Voss served the opposition, sealing motion, public counterparts, and this certificate through the synthetic public filing channel, while confirming that Ashe retained the previously exchanged complete copies under protective handling.

Certification

Mara Voss certifies that the public and complete counterparts have equal page counts and corresponding logical subjects; the complete copies are wholly synthetic; no real person or restricted court record is represented; and the sealed materials were handled outside electronic court access.

Filed February 26, 2026. This certificate supplies provenance and service facts only. It grants no access, resolves no privilege claim, and does not transform the January 29 or February 5 exchanges into earlier filing dates.
