

**SYNTHETIC TRAINING RECORD — FICTIONAL PARTIES, PEOPLE,
OFFICES, IDENTIFIERS, AND EVENTS — NOT A REAL FILING OR
PRESENTENCE REPORT**

Certified District-Court Docket Report

Certified: March 11, 2026 **Synthetic docket:** SYN-MDNC-25-CR-0328 **Public docket entry:** DE44

Tessa Wren certifies this public docket history through the beginning of business on March 11, 2026. The report records titles, dates, access classifications, and procedural sequence. It does not reproduce sealed presentence information or authenticate a real filing system.

The action began with the November 3 criminal complaint and supporting affidavit at DE1. The November 5 indictment was entered at DE5. An arrest return, initial-appearance minutes, and conditions order followed November 6 at DE7. The November 7 detention transcript and order were entered at DE10.

Those opening papers concern a wholly fictional conspiracy and use no genuine address, identifier, account, credential, or operational method. The indictment charges Count One under 18 U.S.C. §§ 1349 and 1343 for a period ending November 2, 2025. This report identifies the entries but does not add facts beyond their public procedural descriptions or expose material from a protected volume.

Pre-Plea and Plea Entries

The discovery production index and confidentiality acknowledgment was entered November 10 at DE13. Serrano filed a notice of intent to change plea on November 12 at DE16. The parties submitted a joint pre-plea status report and 2025 Guidelines Manual notice on November 13 at DE18. Judge Venn's Rule 11 scheduling order followed November 14 at DE20.

Four entries were made November 18. The plea agreement with its appeal waiver and express allocation carve-out is DE22. The stipulated factual basis is DE23. The Rule 11 plea-hearing transcript is DE24, and the order accepting the guilty plea is DE25.

The public plea record shows Serrano's personal confirmation that he understood the broad waiver and the narrow carve-out. It leaves the aggravating-role calculation unresolved. The offense was completed November 2, so the parties identified the 2025 Guidelines Manual. No government breach or post-plea withdrawal motion appears on the docket through certification.

Presentence and Sentencing-Submission Entries

On February 6, the clerk entered DE31, the public surrogate for the sealed objection packet. Its protected companion, PSR-SV-2, combines the January 23 defense objection, January 30 probation position, and February 6 government response. The entry discloses their chronology without exposing protected content.

On February 17, DE32 records the public docket surrogate and category index for the sealed presentence report packet. The paired protected volume is PSR-SV-1 and contains the draft and final exercise reports. The public side is a surrogate, not a redacted report.

On February 19, DE35 recorded the public surrogate for Serrano's sealed sentencing memorandum, maintained as SEN-SV-1. DE36 recorded the public surrogate for the government's sealed sentencing memorandum, maintained as SEN-SV-2. All four protected volumes are fictional, automatically sealed presentence-related artifacts. Public access to their category indexes supplies no permission to inspect them and no access to PACER, CM/ECF, or Probation.

Sentencing, Orders, and Judgment

Sentencing occurred February 24. The hearing transcript is DE37. The public minute entry and reasons summary—not the confidential statement-of-reasons form—is DE38. The separate order overruling the aggravating-role objection is DE39, and the Rule 32(j) appellate-rights notice is DE40.

The court adopted total offense level 20, criminal history category I, and an advisory range of 33 to 41 months. It imposed 36 months of imprisonment, three years of supervised release, restitution of \$186,400, a \$100 assessment, and no fine. The transcript records that Judge Venn did not personally invite Serrano to speak before sentence and that no contemporaneous objection was made.

The criminal judgment was entered February 25 at DE41. No motion listed in Rule 4(b)(3), motion to alter the judgment, or other postjudgment filing appears through the time this report was certified. The docket contains no entry changing the judgment or the ordinary appeal timetable.

Certification Status on March 11

As of this certification, DE41 is the final entered judgment. DE42 and DE43 are ordinary internal exercise notices concerning service and record preparation; they add no substantive filing and are not reproduced in the certified source set. DE44 is this report.

The clerk has reviewed the public docket, sealed-volume ledger, and page inventory for completeness. The public record includes charging papers, pre-plea filings, plea materials, category surrogates, the sentencing transcript, public orders, rights notice, and judgment. Protected volumes remain separately designated.

No notice of appeal had been entered when the clerk began and certified this report at the opening of business on March 11. A later filing on the same day, if any, will receive its own docket entry and will not be retroactively treated as part of this certification. No appellate docket, ruling, or disposition is stated here.

I, Tessa Wren, certify these fictional facts on March 11, 2026. This report contains no genuine court data, person, account, credential, or presentence material. It establishes only the synthetic district docket sequence through DE44.
