

SYNTHETIC APPELLATE DOCKET — NOT FILED — ALL FACTS AND IDENTIFIERS
ARE FICTIONAL

UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

ORDER RECORDING BRIEFING COMPLETE

Required inventory

Entered April 17, 2026.

The court records briefing complete in *Leora Benton v. Blue Cedar Compliance, Inc.*, No. SYN-CA4-26-CV-4101. Appellant filed an opening principal brief on March 16, 2026. Appellee filed a response principal brief on April 15, 2026. Appellant filed notice on April 17 that no optional reply brief would be submitted. The clerk has checked those documents against the February 20 record-complete and briefing order and finds the required principal-brief inventory present.

The briefs identify both preserved issues and use the certified JA1–JA262 record. Neither party reports a pending extension, motion to supplement the record, or motion concerning confidential material. Completion of briefing is an administrative and procedural determination. It does not resolve the parties' disputes about the scope of the exclusion ruling, the inferences permitted by the admitted evidence, or the proper appellate disposition.

ORDER RECORDING BRIEFING COMPLETE

Submission status

The appeal is eligible for the court's Rule 34 determination. The clerk shall present the briefs and certified record for consideration of whether oral argument will aid the decisional process. If argument is selected, a separate calendar notice will state the argument date and allocation. If the appeal is submitted without argument, a separate order will record that choice. The parties shall not infer either path from this briefing-complete order alone.

Counsel must continue to notify the clerk promptly of a change in contact information or a matter affecting jurisdiction. Any supplemental authority must comply with the applicable rule and may not introduce a new factual record. By direction of the court, briefing is complete as of April 17, 2026, and the clerk shall serve this order electronically on counsel for both parties.
